Films for the Future

A FILM BY JENNIFER BAICHWAL & EDWARD BURTYNSKY

WATERMARK

Friday Jan 23 7:30
Andrews Hall

Join us for a three-part film series bringing light to current topics related to our interactions with our environment.

January 23: Watermark - Edward Burtynsky's acclaimed film, shot in stunning 5K ultra high-definition video and full of soaring aerial perspectives, this film shows water as a terraforming element and the scale of its reach, as well as the magnitude of our need and use.

February 20: GMO-OMG - GMO OMG director and concerned father Jeremy Seifert is in search of answers. How do GMOs affect our children, the health of our planet, and our freedom of choice? Along the way we gain insight into a question that is of growing concern to citizens the world over: what's on your plate?

March 20: The Russian River: All Rivers

This locally produced film explores the diverse forces which have come to shape one of California's iconic rivers — forces which impact rivers and watersheds throughout the world. It examines how the Russian River has been used, and what the consequences of that use have been

Shown on a new 16' theatrical screen on the Rotary Stage
